CHILD LEARNING BOARD

CHILD LEARNING BOARD

Learning Today, Leading Tomorrow.

BY. **OHIDE ANDREW ODOHU**

PROBLEM STATEMENT

- Many children in refugee settlements and underserved communities have limited access to digital learning resources.
- Some learners lack educational videos, pictures, interactive quizzes, and personalized learning support.
- Limited access to computers, internet connectivity, and learning materials makes studying difficult.
- Teachers and parents need affordable tools to support children's learning both inside and outside the classroom.

SOLUTION

- Develop a digital learning platform for children aged 8–16.
- Provide lessons for all relevant primary and secondary school classes and subjects.
- Include educational videos, pictures, quizzes, and interactive activities.
- Organize lessons according to school levels and subjects.
- Make the platform simple to use on smartphones and computers.
- Gradually introduce offline learning features for children with limited internet access.
- Help teachers and parents monitor learning progress.

PRODUCT

CHILD LEARNING BOARD is a digital educational platform offering:

- Online learning lessons and study materials.
- Educational videos and pictures.
- Interactive quizzes and practice exercises.
- Class and subject selection.
- Student progress tracking.
- Teacher and parent support features.
- Future AI-powered learning assistance and offline access.

TARGET GROUP/MARKET

- Primary and secondary school children aged 8–16.
- Refugee children in Kakuma and Kalobeyei settlements.
- Children in underserved rural communities in Kenya.
- Teachers and parents who need digital educational resources.
- Schools, community learning centres, NGOs, and education organizations.

MARKET SIZE

The initial market is children aged 8–16 in Kakuma, Kalobeyei, and surrounding underserved communities.

- **Initial market:** Children, families, schools, and learning centres in the target communities.
- **Expansion market:** Other refugee settlements and rural communities across Kenya.
- **Long-term market:** Schools and underserved communities in other African countries.

COMPETITORS

- **Khan Academy:** Provides free online lessons and educational exercises.
- **YouTube:** Offers educational videos on many subjects.
- **Google Classroom:** Helps teachers organize learning activities and assignments.
- **Eneza Education:** Provides digital learning services for learners in Africa.
- **Traditional schools and printed textbooks:** Provide established classroom instruction and study materials.

COMPETITORS ADVANTAGE

- Focuses on refugee children and underserved communities.
- Designed for learners aged 8–16, with organized classes and subjects.
- Combines videos, pictures, quizzes, and learning activities in one platform.
- Designed with simple navigation for beginner digital users.
- Plans to support offline learning where internet access is limited.
- Developed with an understanding of the educational challenges faced by children in Kalobeyei and Kakuma.
- Has the potential to work with schools, teachers, parents, and humanitarian organizations.

PROJECT TRACTION

Month 1 — Research and Planning

Month 2 — Build the First Version

Month 3 — Pilot Testing

Month 4 — Improve and Expand

Month 5 — Launch and Measure Results

BUSINESS MODEL

- Free basic learning resources for children who cannot afford to pay.
- School or institutional subscriptions for additional features.
- NGO and donor sponsorships to support refugee learners.
- Grants and education innovation funding.
- Optional premium services for institutions that can afford them.

GO TO MARKET

- Partner with schools, teachers, NGOs, and community learning centres.
- Demonstrate the platform to parents and learners in Kakuma and Kalobeyei.
- Promote through WhatsApp, Facebook, and community networks.
- Offer free trials to attract learners and schools.
- Use referrals to reach more families.

SOCIAL IMPACTS

- **SDG 4:** Quality Education — affordable, accessible learning.
- **SDG 10:** Reduced Inequalities — support underserved and refugee children.
- **SDG 9:** Industry, Innovation and Infrastructure — promote digital learning.
- **SDG 17:** Partnerships for the Goals — collaborate with schools and NGOs.

OUR ASK!

We seek **funding, mentorship, technology, and partnerships** to develop and launch CHILD LEARNING BOARD.

Funds will support:

- Website and app development.
- Educational videos, pictures, and learning content.
- Internet access, testing, and offline features.
- Pilot implementation and community outreach.

THANKS!
